

Superior: **Service** **Support** **Savings** **Satisfaction****The INTEGRA 9500 Verifier**

Features	9500	Comments
Camera Reading Device (area)	YES	No moving parts to breakdown. The MTBF is rated in years of service. Automatic aperture sizing is based on ISO/CEN/ANSI guidelines.
Laser Reading Device	NO	
CCD Reading Device (linear)	YES	
Linear Codes	YES	
RSS Stacked Codes	YES	
Composite Code™	YES	
Data Matrix	YES	
PDF417 / Micro PDF417	YES	
Computer	YES	Complete self contained Windows XP computer system
Ten Scan Automation	YES	The INTEGRA™ 9500 verifier reads and analyzes every 0.002" of the height of the bar code, far exceeding ISO
Human Readable Validation	YES	Unique to the INTEGRA™ 9500 verification system, human readable validation reads and compares the human readable characters to the bar code encodation, & verifies that they match.
Network Compatible	YES	10/100 LAN Ethernet Card (internal to system)
Blemish Detection	YES	Not an ISO parameter, but very useful in determining the quality of a bar code symbol. The Blemish grade specifies the percentage of the bar code that has been destroyed (thus not readable) by print defects.
