NO	Customer must supply Windows XP computer system
YES	The INTEGRA™ 9505 FBV verifier reads and analyzes every 0.002" of the height of the bar code, far exceeding ISO
YES	Unique to the INTEGRA™ 9505 FBV verification system, human readable validation reads and compares the human readable characters to the bar code encodation, & verifies that they match.
YES	Customer supplied PC 10/100 LAN Ethernet Card
YES	Not an ISO parameter, but very useful in determining the quality of a bar code symbol. The Blemish grade specifies the percentage of the bar code that has been destroyed (thus not readable) by print defects.
